David Capiola, M.D. | Nicole Kosuda, P.A.

3225 Westchester Avenue, Bronx, NY 10451

Office: 451 Main Street, 2nd Floor, New Rochelle, NY 10801

Initial orthopaedic examination

Patient: Justin W. Sapini

DOB: 12/21/1995

Accident date: 04/23/2023

Visit date: 05/17/2023

Male | 5 ft 11 in | 195 lbs | Right-hand dominant | Age 27 at accident

Address at accident: 7 Valley Drive, Nanuet, NY 10954

Financial advisor, Northwestern Mutual, commission only; out of work since accident

Coverage history: Progressive no-fault via own auto policy; later Medicaid

HISTORY

Motor vehicle accident on 04/23/2023, driver, sideswiped on the driver's side. Initial orthopaedic evaluation of the left shoulder. Right-hand dominant. Financial advisor at Northwestern Mutual, paid on commission; out of work since the accident.

COMPLAINTS AND EXAMINATION

Left shoulder pain with reaching, dressing and overhead activity. Active forward elevation 110 degrees and abduction 90 degrees, limited by pain. Distal hand function and sensation grossly intact.

ASSESSMENT

Persistent left shoulder symptoms following the reported motor vehicle accident. Shoulder MRI findings are not yet available at this visit.

PLAN

Further left shoulder evaluation and MRI review when available. Activity modification and follow-up. No operative date is established in this initial visit.

Shoulder MRI review and follow-up**Patient: Justin W. Sapini****DOB: 12/21/1995**

Accident date: 04/23/2023

Visit date: 06/07/2023

Male | 5 ft 11 in | 195 lbs | Right-hand dominant | Age 27 at accident

Address at accident: 7 Valley Drive, Nanuet, NY 10954

Financial advisor, Northwestern Mutual, commission only; out of work since accident

Coverage history: Progressive no-fault via own auto policy; later Medicaid

HISTORY

Motor vehicle accident on 04/23/2023, driver, sideswiped on the driver's side. Persistent left shoulder pain; right shoulder complaints also noted.

LEFT SHOULDER MRI, 05/24/2023

Partial tear of the posterior inferior labrum at 8-9 o'clock. Low-grade interstitial tear of the posterior infraspinatus fibers. Thickening of the inferior glenohumeral ligament. Hypoplasia of the posterior inferior glenoid (posterior glenoid rim deficiency).

RIGHT SHOULDER MRI, 05/24/2023

Intermediate-grade interstitial tear of the anterior half of the infraspinatus. Partial tear of the posterior inferior labrum at 8 o'clock.

PLAN

Findings reviewed. Continue left shoulder treatment planning and reassess symptoms. The left shoulder remains the immediate focus of surgical evaluation.

Pre-operative consultation: left shoulder**Patient: Justin W. Sapini****DOB: 12/21/1995**

Accident date: 04/23/2023

Visit date: 07/12/2023

Male | 5 ft 11 in | 195 lbs | Right-hand dominant | Age 27 at accident

Address at accident: 7 Valley Drive, Nanuet, NY 10954

Financial advisor, Northwestern Mutual, commission only; out of work since accident

Coverage history: Progressive no-fault via own auto policy; later Medicaid

HISTORY

Motor vehicle accident on 04/23/2023, driver, sideswiped on the driver's side. Left shoulder symptoms persist. Pre-operative consultation for left shoulder arthroscopy.

IMAGING AND EXAMINATION

The 05/24/2023 left shoulder MRI describes the posterior inferior labral tear, low-grade posterior infraspinatus interstitial tear, inferior glenohumeral ligament thickening and posterior inferior glenoid hypoplasia. Active shoulder motion remains painful.

OPERATIVE PLANNING

Left shoulder examination under anesthesia and arthroscopy planned for 07/26/2023 with Dr. David Capiola at New Horizon Surgical Center, LLC. Procedure options reviewed in relation to the documented shoulder findings.

PLAN

Proceed with the planned left shoulder procedure and postoperative rehabilitation. This note addresses the left shoulder; it does not schedule a right shoulder procedure.

Post-operative office follow-up

Patient: Justin W. Sapini

DOB: 12/21/1995

Accident date: 04/23/2023

Visit date: 08/09/2023

Male | 5 ft 11 in | 195 lbs | Right-hand dominant | Age 27 at accident

Address at accident: 7 Valley Drive, Nanuet, NY 10954

Financial advisor, Northwestern Mutual, commission only; out of work since accident

Coverage history: Progressive no-fault via own auto policy; later Medicaid

HISTORY

Motor vehicle accident on 04/23/2023, driver, sideswiped on the driver's side. Follow-up after left shoulder arthroscopy on 07/26/2023.

INTERVAL STATUS

Reports left shoulder soreness following surgery. Portal sites clean and dry. Hand and wrist motion intact. Pain rated 4/10. Shoulder motion assessed cautiously without forced movement.

ASSESSMENT AND PLAN

Postoperative recovery following the documented left shoulder procedure. Continue staged rehabilitation and activity precautions through the treating team. Continue physical therapy follow-up.

DOCUMENTATION

This selected postoperative visit is included in the simulated surgeon fee; no separate office charge is assigned.

Visit date: 12/06/2023

Male | 5 ft 11 in | 195 lbs | Right-hand dominant | Age 27 at accident

Address at accident: 7 Valley Drive, Nanuet, NY 10954

Financial advisor, Northwestern Mutual, commission only; out of work since accident

Coverage history: Progressive no-fault via own auto policy; later Medicaid

HISTORY

Motor vehicle accident on 04/23/2023, driver, sideswiped on the driver's side. Financial advisor at Northwestern Mutual, commission only. Out of work since the accident.

CURRENT SYMPTOMS

Residual left shoulder pain following arthroscopy, with right shoulder complaints. Reaching, overhead activity and sustained use remain uncomfortable.

EXAMINATION

Left shoulder forward elevation 145 degrees and abduction 125 degrees with end-range discomfort. Right shoulder movement reproduces the reported pain. Distal hand function remains intact.

OCCUPATIONAL ASSESSMENT

Shoulder symptoms continue to limit comfortable sustained activity. Occupational history records that the patient has not returned to his usual employment. Continue orthopaedic follow-up and rehabilitation review.

Orthopaedic follow-up

Patient: Justin W. Sapini

DOB: 12/21/1995

Accident date: 04/23/2023

Visit date: 01/03/2024

Male | 5 ft 11 in | 195 lbs | Right-hand dominant | Age 27 at accident

Address at accident: 7 Valley Drive, Nanuet, NY 10954

Financial advisor, Northwestern Mutual, commission only; out of work since accident

Coverage history: Progressive no-fault via own auto policy; later Medicaid

HISTORY

Motor vehicle accident on 04/23/2023, driver, sideswiped on the driver's side. Follow-up for the shoulders after the 07/26/2023 left shoulder surgery.

INTERVAL STATUS

Persistent bilateral shoulder complaints. Left shoulder movement has improved relative to the early postoperative period; pain with sustained use remains. Right shoulder symptoms persist.

EXAMINATION

Left active forward elevation 150 degrees, abduction 130 degrees. Right active elevation 130 degrees with pain. Distal motor and sensory function grossly intact.

PLAN

Continue follow-up with the orthopaedic service. Review the documented right shoulder MRI findings and ongoing symptoms. Patient remains out of work by history.

Right shoulder treatment recommendation**Patient: Justin W. Sapini****DOB: 12/21/1995**

Accident date: 04/23/2023

Visit date: 05/27/2024

Male | 5 ft 11 in | 195 lbs | Right-hand dominant | Age 27 at accident

Address at accident: 7 Valley Drive, Nanuet, NY 10954

Financial advisor, Northwestern Mutual, commission only; out of work since accident

Coverage history: Progressive no-fault via own auto policy; later Medicaid

HISTORY

Motor vehicle accident on 04/23/2023, driver, sideswiped on the driver's side. Persistent right shoulder pain. Prior left shoulder arthroscopy on 07/26/2023.

DOCUMENTED RIGHT SHOULDER FINDINGS

MRI dated 05/24/2023: intermediate-grade interstitial tear of the anterior half of the infraspinatus and partial tear of the posterior inferior labrum at 8 o'clock.

RECOMMENDATION

Right shoulder arthroscopy recommended from this visit onward. The procedure is not scheduled. No operative date has been assigned.

PLAN

Continue follow-up concerning symptoms and treatment options. This record documents a recommendation only; it does not document a right shoulder operation or a booked procedure.
